HAIX® CO System

Pressure relief, cushioning, correction of foot position/correct posture and muscular balance.

HAIX® Climate System

The HAIX Climate system uses the pumping movement, which permits air circulation with every step – warm air is released and fresh air comes in through the vent holes at the top of the boot.

HAIX® Absorption

Absorption with cushioning wedge which is built into the sole.

HAIX® AS System

The HAIX Arch Support System supports the natural curvature of the foot. Toes and joints have thereby sufficiently more space. Keeps foot in the best position for optimal foot health.
